

API Documentation Structure

This is a suggested structure, but is by no means the only way to structure the documentation. Many of these sections are optional, depending on the complexity of the API, and whether it is a web API or platform API.

- Overview (Why use the API? Provide use cases)
 - Getting Started
 - Key Concepts
 - Workflow
 - Architecture (primarily for platform APIs or complex web APIs)
 - Authentication (primarily for web APIs)
 - Tutorials
 - How to...
 - How to...
 - How to...
 - Sample Code
- Reference
 - Classes (for platform APIs)
 - Endpoints (for web APIs)
 - Status codes and errors (for web APIs)
